

Made, Serviced and Supported in Canada

### **VESSEL MONITORING SYSTEM**

## **Key Features**

- Department of Fisheries and Oceans Canada certified for monitoring vessels
- An automatically generated message is transmitted 24 times a day consisting of vessel position, heading, speed and time
- Two-way communications via satellite telemetry
- Message frequency can be updated from shore, to generate and transmit a position at various time periods
- LED's on the unit provides indication of power on/off, transmit/receive and status
- Units are GPS-equipped (10 m (33 feet) CEP, 45 sec cold start)
- Data is sent via E-mail, internet and/or direct IP to end users
- Geofencing capability provided. Shock and Vibration tested to ISTA 1A specifications
- Temperature tested from  $-40^{\circ}$ C to  $+70^{\circ}$ C ( $-40^{\circ}$ F +  $158^{\circ}$ F)
- Surge and reverse polarity protected
- Distress/panic button included
- Manufactured under ISO 9001 compliance
- IP68 rated enclosure (1m for 1 hour)

### **Optional Features**

- Communications port for future expandability, including PC communications and external sensors
- At sea e-mail capability
- Emergency vessel position trigger
- Weather reports

## **Technical Specifications**

Lenath [20.63 cm (8.125 inches) Width 16.25 cm (6.400 inches) Heiaht 6.350 cm (2.500 inches) Weiaht 0.884 kg (1.95 LBS) Transmit frequency 1616 MHz to 1626.5 MHz 1.6 Watts Transmit power

1616 MHz to 1626.5 MHz Receive frequency

Sensitivity(minimum) -118 dbm

**Battery requirements** 12 volt Lead Acid Battery (Supplied) 12 to 32 VDC (External Power) **Power requirements** Transmit 2.5 A max.monitoring

Power use (measured at the battery points)

**Position Accuracy** 100 mAGPS ±10 m (nominal) -40 to 70° C (-40°F + 158°F) -40 to 70° C (-40°F + 158°F) ISTA 1A specifications

Operating temperature Non-operating temperature **Shock & Vibration**
